# DIVE INSTRUCTOR ACADEMY

Choosing Dive Instructor Academy will put your success first. Course Director Kai Steinbeck offers PADI IDC programs through working 5 star PADI IDC centres located at Mooloolaba on the Sunshine Coast.

I am so confident of your success that that I offer an unparalleled guarantee. Whilst it is most unlikely that you don't pass your IE after having been trained with me, anyone can have a bad day and this promise gives you the ultimate security in investing your valuable money into your IDC training with me!  
If you are unsuccessful at your IE, I will pay your PADI fees to re-sit the failed segment at another IE and offer you free remedial training at another IDC.

My instructor development program is so much more than just the minimum requirements that others offer. In order to stand out from the rest we include the Nitrox, Oxygen and boat Instructor Specialty rating, to make you stand out from other instructors. You must be certified as a Nitrox recreational diver. If not, we can help you get there during your IDC.

As part of the IDC with Kai program you have access to my own theory eLearning platform which will prepare you for all the scuba diving theory covering physics, physiology, equipment, recreational dive planner and skills and environment. This is a perfect way to be able to start your IDC training today. All theory sections will also be reviewed again during the Instructor Development Course.

Increase your knowledge of the marine life with our exclusive marine life knowledge course which is part of your PADI IDC. This course was developed in conjunction with a marine biologist covering 14 modules of marine life knowledge essential for your dive instructor career. It is offered on an eLearning platform which you have access to for life.

# DIVE INSTRUCTOR ACADEMY

## COURSE STRUCTURE

The PADI IDC is divided into four sections:

### 1.) Start at home with eLearning

You can start your PADI IDC anytime. In order to start the PADI IDC you must complete an eLearning section which covers 16 modules. You will also have access to my exclusive theory eLearning platform to refresh your knowledge of physics, physiology, RDP, equipment and skills & environment.

### COURSE DURATION

11 days IDC  
2 days EFR  
2 days IE

### 2.) Classroom presentations

During this section we will teach you the entire PADI learning system covering all the PADI courses from Openwater to Divemaster including specialties. We cover PADI standards as well as how to teach in the classroom. You will present classroom presentations from all PADI dive courses to prepare you for the real world of teaching scuba diving

### 3.) Confined water

During the confined water section of the PADI IDC program we will teach you how to demonstrate underwater skills, control students, correct problems and how to teach students the skills required to learn to scuba dive.

We will also practice diver rescues and other skills required in the openwater section before going out to sea.

### 4.) Openwater

During the openwater section of your IDC we put it all into practice. This module gets you out into the ocean and this is where your fellow candidates role play to be your students. During this module you will cover skills from the openwater, advanced, rescue and divemaster course. The rescue we practiced in the pool will be perfected here.

## YOUR COURSE DIRECTOR

I am a PLATINUM PADI Course Director. My diving career started when I was 16 years old in the Dominican Republic. Ever since I took my first breaths underwater I was mesmerised by the beauty of the marine environment. I've made the dive industry my career in 1993 when I became a PADI Openwater Scuba Instructor in Australia.

### SPOKEN LANGUAGES

English  
German

chat to me on Facebook  
@IDCwithKAI

I started in the dive industry as a PADI Openwater Scuba Instructor working in Australia putting my language skills to good use teaching in different languages. Over time I became a trip director for various liveaboard vessels which took me all over the Great Barrier Reef.

Eventually I became a skipper and after a few years ended up managing the marketing department of one of the worlds largest dive companies. I love the fact that the dive industry has limitless avenues to progress your career.

As a PADI course director I started Dive Instructor Academy as I love teaching. It is so rewarding to see candidates progress through the courses and make their dreams become a reality. I truly love passing on my knowledge gained in the scuba industry on diver education, marine life and marine conservation

As a hobby I am an underwater photographer and love shooting macro and wide angle

## TESTIMONIALS

### MAEVE

Kai's personality and professionalism feel eerily matched to the role of teaching IDCs. He's thoughtful, generous, motivated and creates a well balanced environment of good times and intense learning. He's committed to the success of each candidate and when you're exhausted a few long days in, you'll probably begin to notice the tip of the iceberg of a mammoth effort he's putting in behind the scenes- a good motivator to keep pushing.

The crew were endlessly kind, supportive and helpful and it was extra special having a few off-the-cuff chats with the staff on their diving and related experiences. Thanks Kai for an amazing IDC experience!

### MARCO

Coming into the IDC I was not sure what to expect as to how the course would be presented. I am happy to say that it was the best two weeks. Nothing but professionalism! It was fun and everyday you learned something that will stay with you for life! I would recommend this IDC with Kai to anyone who is interested in becoming a scuba diving instructor.

### MATT

Want to become PADI Instructor? Then I recommend you IDC with Kai. His passion about teaching and his positive way of teaching will keep you focused during the whole IDC. Dive theory and PADI General standards and procedures in a way that it's always applied to real Instructors life and not only for passing the IE. With Kai even classroom sessions are fun.

Also during the skill sessions for confined and open water you will realize that Kai is a mentor instead of a military style course director.

Kai will also support you after IDC, if you need advice, he will be there to support you. A real mentor and it was a pleasure to join IDC with Kai.

Want to not only pass IE and want to be prepared as well for real Instructor life after IE? do your IDC with Kai!
